

access: anywhere

Remote Web Client for CardAccess 3000 – with an emphasis on **remote**

Stay in control of your access control system wherever you might be with the new Remote Web Client for CardAccess 3000. Works seamlessly with Internet Explorer and enables remote updates: Full hardware configuration of panels, relays and inputs; remote locking/unlocking of doors and relay activation; access to view events, time and attendance, as well as personnel and badging changes and in-list reports. Add this to CardAccess 3000's integrated access, alarms, CCTV, DVR/NVR, badging, visitor management and cross time zone support and you can sit back and relax wherever you are.
