Introducing Badging3000!

Continental Access new photo-badging interface for CardAccess® 3000 software

Optional Badging3000 photo-badging package for Continental CA3000 software enables users to easily capture employee images, add custom text and images, create custom card layouts and print ID cards or credentials with magnetic stripes, barcodes, Smart chips and/or holographic images.*

The Badging3000 package is extremely flexible. Employee images can be captured remotely with a handheld digital camera, no need for special capture devices, and imported into the PC. Or, photos can be directly captured via our point and click image station with badging printer, custom backgrounds, video camera and capture card. **

Continental Badging3000 also comes with many time saving features including a smart, face finding tool. This feature enables users to capture consistent photos every time by automatically cropping to the face portion of the photograph.

Badging3000 database management tools enable users to quickly view, retrieve and reprint cards.

Feature list:

- Drag-and-Drop WYSIWYG Badge template editor
- Desktop automated camera capture
- Context sensitive online help
- Integration with CA3000 SQL Database
- User defined badge templates

Continental Access
