# DL-WINDOWS™ V5.5.4 RELEASE CHANGES / NEW FEATURES

WI2494LF 1/23

Completely backward compatible, release V5.5.4 contains various new features and improvements from V5.5.3:

## AL Card Management Suite Application AL-IDRW Card Write-ReWriter Support

The Alarm Lock **AL Card Management Suite** software and **AL-IDRW Card Write-ReWriter** allow for the easy addition, deletion and replacement of proximity cards for Networx door locks.

The **AL Card Management Suite** software is a subset of DL-Windows V5.5.4, and provides a simplified user interface intended for use by any authorized person (such as a doorman in an apartment building). They can easily add, delete and replace proximity cards *without needing to be familiar with the full workings of DL-Windows*.

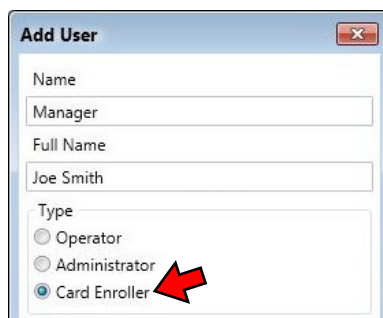

AL-IDRW  
 Card Write-ReWriter

Completing the card programming requires the cardholder to simply present their new card to the lock's proximity reader. If a lost card is later found and presented, access will be denied. The new **AL Card Management Suite User Guide** (OI417LF) is available to provide the simple step-by-step procedures.

As an added measure of security, the **AL Card Management Suite** only supports special Alarm Lock **AL-IDRW 37 Bit** (ALID1326) proximity cards and MX1587 key fobs.

## New "Card Enroller" User Type

DL-Windows allows those with Administrator-level privileges to authorize an individual to use the **AL Card Management Suite** software. Before the **AL Card Management Suite** software can be used with the selected physical door lock, certain items must be programmed in DL-Windows V5.5.4 and the programming must be downloaded to the physical lock. The **Add User** dialog, shown at right, was updated in the **Tools** menu (**Tools > Manage Users > Add**) with this new "Card Enroller" Type.

To authorize an individual to use the **AL Card Management Suite** software, complete the Name fields and select the **Card Enroller** radio button. This new user will simply log in to the **Suite** software with their assigned **User Name** and **Password**, as described in the new User Guide (OI417LF). The new user will be unable to access DL-Windows accounts but will have full access to the **AL Card Management Suite** software.

\*Does not unlock the CABL1NB.

Version 3 Gateways are now equipped with a local wireless network whereby the Gateway can be detected by almost any wireless device (such as a smartphone) and can be configured for any wireless network using a web browser -- all without needing a hard-wired connection nor DL-Windows. There is no need to be physically located at the installation site -- you can use a browser to pre-configure the Gateway with your customer's Wi-Fi network settings from virtually any location.
