Subject: SQL Express 2012 *Fusion Active Template Library (ATL)* Status

Models: DL-Windows V5

If an SQL Express 2012 installation results in a "**Fusion Active Template Library (ATL)**" failed status, proceed as follows:

1. Update the MS Windows operating system, ensuring all cumulative updates for SQL are included. The most recent update for SQL Express 2012 is Build 11.0.2424.0 (refer to Microsoft article, [here](#)).
2. Restart the installation PC after the update (note that additional restarts may be required).
3. After the update is completed, run the SQL Express **.EXE** installer included with the DL-Windows installation files. Select the **x86** or **x64** file, as follows:
 - **SQLEXP32_x86_ENU.EXE** - (32-bit version of SQL Express for a PC running a 32-bit Operating system)
 - **SQLEXP_x64_ENU.EXE** - (64-bit version of SQL Express for a PC running a 64-bit Operating System)

The above steps will clear all SQL installation issues.
