

Continental Access CA-ASA Server Appliance

Appliance Based Access Control & Integration

CA-ASA

The Continental Access ASA is a solid-state network appliance that runs on an embedded Operating System. It comes pre-installed with the latest version of CA4K Integrated Access Control Enterprise Software with Full Native Client, Web Interface, and Access Manager APP. There are no moving parts, and it is built upon a rugged, embedded computing platform. It features a reliable 250 GB solid state drive with an Intel® processor and 8 GB of RAM. There is no software to install and a common web browser is all that is required to operate the system. This easy-to-install Access Server Appliance features a browser-based interface making the system user accessible, regardless of operating system being utilized to gain access into the system without any additional software or licensing. The unit may be used on a desktop, mounted on a wall or monitor (shown on page 2) with the included mounting bracket.

The CA-ASA's pre-installed software lets you spend less time installing and configuring applications, gathering license data, or installing service packs. Its 250 GB Solid State Drive (SSD) has no moving parts, which makes it less fragile than spinning hard disks which can wear out with repetitive use. Access time and latency are low as there are no mechanical delays. The database resides on the 250 GB solid state drive and is supported by automatic backup and maintenance functions. This Access Server Appliance is compatible with all Continental Access Control Panels. Software updates and firmware are loaded and distributed throughout system control panels over the network as part of the download to the controllers.

Continental's IP-Based Access Control System integrates with the NAPCO Gemini™ Commercial Intrusion Alarm Systems, Badging 4K, Networx Wireless Locksets, Net-Panel and Networx ArchiTech™ Customizable Wireless Locksets.

Features & Advantages:

- NO Annual Support Fees (optional YUP Available)
- NO Reader / Door or System Size Licensing
- NO Software to Install
- NO Server or Dedicated PC Required
- Includes Three GUIs
 - Full Native Client
 - Web Browser Interface
 - Access Manager APP
- Dynamic Map(s) Control
- Integrates to Badging 4K Photo ID Solution

Continental Access CA-ASA Server Appliance

Specifications:

- Small Form/Fit (4L" x 4W" x 2H")
- Intel Processor
- 8 GB RAM
- 3 USB Type A (v3.1) Ports
- 2 USB Type C Ports
- HDMI (2.0A) Port
- 250 GB Solid State Drive
- 128 GB Thumb Drive
- T-base 10/100/1000 Network Port
- Win10 Pro Operating System
- CA4K Five User Software Pre-Installed
- SQL Management Studio Included
- Automatic Backup Utilities Pre-Loaded

- TeamViewer Pre-Installed
- All Hardware and Software Manuals Included
- Network Programming Utilities Pre-Loaded
- Web Interface and Access Manager App Pre-Installed

System Includes:

- Appliance with Mounting Bracket
- CA4K Five User software
- CA4K software
- Power Supply
- Keyboard
- Mouse
- Thumb Drive
(includes system image & DB Backup)

Flexible mounting options
(Does not include monitor)
